Header

The header I would like to have a home bar at the top that allows me to navigate back to the main page.

From there I would like also for it to be a base color, not super flashy but base like black.

And then I would like something to label the top of the page of what it is.

Body

For the body I would like 3 columns put in for different sections. And the back ground color being blue.

From there I would like the three columns to have black letters

Footer

For the footer I would like it to be base and plane, I don't really need anything there. Though I would like and site sources to be put down there, to give credit
